Bosh muharrir:

Sharipov Kongiratbay Avezimbetovich

Bosh muharrir o'rinbosari:

Karimov Norboy G'aniyevich

Elektron nashr. 678 sahifa.

E'lon qilishga 2024-yil 19-aprel kuni ruxsat etildi.

Muharrir:

Qurbonov Sherzod Ismatillayevich

Tahrir hay'ati:

Salimov Oqil Umrzoqovich, O'zbekiston fanlar akademiyasi akademigi
Abduraxmanov Kalandar Xodjayevich, O'zbekiston fanlar akademiyasi akademigi
Rae Kvon Chung, Janubiy Koreya, TDIU faxriy professori, "Nobel" mukofoti laureati
Osman Mesten, Turkiya parlamenti a'zosi, Turkiya – O'zbekiston do'stlik jamiyati rahbari
Sharipov Kongiratbay Avezimbetovich, t.f.d., prof., O'zR Oliy ta'lim, fan va innovatsiyalar vaziri
Buzrukxonov Sarvarxon Munavvarxonovich, i.f.d., O'zR Oliy ta'lim, fan va innovatsiyalar vaziri o'rinbosari
Axmedov Durbek Kudratillayevich, i.f.d., prof., O'zR Oliy Majlisi qonunchilik palatasi deputati
Axmedov Sayfullo Normatovich i.f.n., professor, MIM akademiyasi rektori
Xudoyqulov Sadirdin Karimovich, i.f.d., prof., TDIU YoMMMIB birinchi prorektori
Abduraxmanova Gulnora Kalandarovna, i.f.d., prof., TDIU Ilmiy ishlar va innovatsiyalar bo'yicha prorektori
Kalonov Muxiddin Baxritdinovich, i.f.d., prof., "O'IRIAM" ilmiy tadqiqot markazi direktori – prorektor
Yuldashev Mutallib Ibragimovich, i.f.d., TMI professori
Samadov Asqarjon Nishonovich, i.f.n., TDIU professori
Slizovskiy Dimitriy Yegorovich, t.f.d., Rossiya xalqlar do'stligi universiteti professori
Mustafakulov Sherzod Igamberdiyevich, i.f.d., prof., Xalqaro "Nordik" universiteti rektori
Aliyev Bekdavlat Aliyevich, f.f.d., TDIU professori
Axmedov Ikrom Akramovich, i.f.d. TDIU professori
Po'latov Baxtiyor Alimovich, t.f.d., professor
Eshtayev Alisher Abdug'aniyevich, i.f.d., TDIU professori
Isakov Janabay Yakubbayevich, i.f.d., TDIU professori
Musyeva Shoira Azimovna, SamDu IS instituti professori
Axmedov Javohir Jamolovich, i.f.f.d., "El-yurt umidi" jamg'armasi ijrochi direktori o'rinbosari
Toxirov Jaloliddin Ochil o'g'li, t.f.f.d., TAQU katta o'qituvchisi
Xalikov Suyun Ravshanovich, i. f. n., TDAU dotsenti
Kamilova Iroda Xusniddinovna, i.f.f.d., TDIU dotsenti
Nosirova Nargiza Jamoliddin qizi, i.f.f.d., TDIU dotsenti
Rustamov Ilhomiddin, f.f.n., Farg'ona davlat universiteti dotsenti
Fayziyev Oybek Raximovich, i.f.f.d. (PhD), Alfraganus universiteti dotsenti
Sevil Piriyeva Karaman, PhD, Turkiya Anqara universiteti doktoranti
Mirzaliyev Sanjar Maxamatjon o'g'li, TDIU mustaqil tadqiqotchisi
Utayev Uktam Choriyevich, O'zR Bosh prokuraturasi boshqarma boshlig'i o'rinbosari
Ochilov Farxod, O'zR Bosh prokuraturasi iqtisodiy jinoyatlarga qarshi kurashish departamenti bo'limi boshlig'i
Yaxshiboyeva Laylo Abdisattorovna, TDIU katta o'qituvchisi

Ekspertlar kengashi:

Berkinov Bazarbay, iqtisodiyot fanlari doktori, professor
Hakimov Ziyodulla Ahmadovich, i.f.d, TDIU dotsenti
Tuxtabayev Jamshid Sharafetdinovich, i.f.f.d, TDIU dotsenti
Xamidova Faridaxon Abdulkarim qizi, i.f.d., TMI dotsenti
Babayeva Zuhra Yuldashevna, TDIU mustaqil tadqiqotchisi

Muassis: "Ma'rifat-print-media" MChJ

Hamkorlarimiz: Toshkent davlat iqtisodiyot universiteti, O'zR Tabiat resurslari vazirligi, O'zR Bosh prokuraturasi huzuridagi IJQK departamenti.

HUMAN CAPITAL IN EDUCATION

Ibragimov Mansur Mardonovich

PhD, Associate professor of Samarkand Institute of Economics and Service

Ergashev Olloyor

Graduate student

Abstract: This article discusses the economic significance of human capital, the level of development of human capital in our country and the modernization of the education system, which plays an important role in the further development of human capital. The measures taken were analyzed. It also provides practical suggestions and recommendations on the current importance of human capital and the positive results that can be achieved as a result of its development, as well as the measures that need to be taken in this regard.

Key words: Human capital, human capital index, digital technologies, education, digital generation, IT, scientific capacity efficiency, computer graphics, robotics, educational programs, web resources, information literacy.

Annotatsiya: Ushbu maqolada inson kapitalining iqtisodiy ahamiyati, mamlakatimizda inson kapitalining rivojlanish darajasi va ta'lim tizimini modernizatsiya qilish masalalari ko'rib chiqilgan. Inson kapitalining bugungi kundagi ahamiyati va uni rivojlantirish natijasida erishilishi mumkin bo'lgan ijobiy natijalar, bu borada amalga oshirilishi lozim bo'lgan chora-tadbirlar yuzasidan ham amaliy taklif va tavsiyalar berilgan.

Kalit so'zlar: Inson kapitali, inson kapitali indeksi, raqamli texnologiyalar, ta'lim, raqamli avlod, IT, ilmiy salohiyat samara-dorligi, kompyuter grafikasi, robototexnika, ta'lim dasturlari, veb-resurslar.

Аннотация: В данной статье рассматривается экономическое значение человеческого капитала, уровень развития человеческого капитала в нашей стране и модернизация системы образования. Также приводятся практические предложения и рекомендации относительно актуального значения человеческого капитала и положительных результатов, которых можно достичь в результате его развития, а также мер, которые необходимо принять в этом отношении.

Ключевые слова: Человеческий капитал, индекс человеческого капитала, цифровые технологии, образование, цифровое поколение, ИТ, эффективность научного потенциала, компьютерная графика, робототехника, образовательные программы, веб-ресурсы, информационная грамотность.

RELEVANCE OF THE RESEARCH TOPIC

In the 21st century, a number of changes, such as the advancement of science to a new level, the digitalization of all existing industries and networks, the acceleration of the introduction of digital technologies into our social life, caused the digital revolution. As a result, the role of human capital in the modern economy is increasing. Human capital has a strong influence on economic growth and development and reflects the capabilities of productive forces in society. As President Sh.M.Mirziyoyev noted, first of all, attention should be paid to supporting education, which is the biggest investment for New Uzbekistan ^[1].

In order to improve the conditions for the development of human capital in our country, many measures are being implemented by our government, with a good understanding of the above positive aspects. In particular, in the decree on approval of the "Digital Uzbekistan – 2030" strategy and measures for its effective implementation:

- development of human capital as well as specialized education and popularization of professions in the IT field, training and support of talented IT specialists;
- the formation and introduction of requirements for the basic competences of the digital economy for each level of education in the educational system, ensuring their continuity;
- organization of laboratories for the application and study of Internet products, robotics, artificial intelligence technologies in the relevant fields of higher education institutions;
- development and promotion of scientific research in the field of digital technologies, improvement of their organizational mechanisms, etc., aimed at forming a generation of digital personnel and implementing measures aimed at increasing digital skills in the field of education ^[2].

ANALYSIS OF LITERATURE ON THE TOPIC

The study of human capital as an economic category has a history of gradual formation, one of the founders of the theory of human capital, the American economist T. Shults introduced the concept of “human capital” into the scientific literature and defined it as “the knowledge used to meet the diverse needs of a person and society as a whole”, defined as a set of skills and qualifications [3]. He understood investments in human capital as investments in educational institutions, enterprises and organizations, in improving the skills of employees, in healthcare organizations, as well as in science and education. G. Becker, who conducted research at the same time with him, in his work “Human capital” tried to justify the fact that human capital, like physical capital, is depreciated, and that this depreciation is caused by the professional activity and skill level of the employee [4].

Today, many scientists are conducting research on the study, analysis and development of human capital. For example, Russian scientists Y. Boyko, S. Surkov, S. Plavunov in their work entitled “The rational use of human capital to improve the activities of organizations”: “The main task of the management apparatus is not only the development of the enterprise or organization, but also the direction to continue in the future and higher. It is the development of talents, i.e., human capital, which allows us to realize that growth rates can be achieved. The higher the intellectual potential of the employees, the more they can foresee the future, study the demands and needs of people and create the products of the future” [5].

E. Z. Karpenko in his work “Conditions for the formation and development of human capital”: “Human capital is a person’s innate intellectual ability and talent, as well as the potential ability to earn income based on human training, knowledge and practical skills. Defines that it is expressed capital [6].

Uzbek scientists F.Kh. Rakhimov, B.Sh.Usmanov’s article entitled “The role of human capital in innovative development” defines human capital as follows: “Human capital is a reserve of abilities, skills and goals accumulated in a person, and any it is a factor that ensures the competitiveness of the country and the state economy in the world market, has a strong influence on the activities of state administration, legislative and executive bodies [7].

Summarizing the above points, today human capital is the sum of knowledge, skills and qualifications and experiences people have acquired during their lives. requires medical care.

RESEARCH METHODOLOGY

In the article, the methods of scientific abstraction, analysis and synthesis, comparison and comparison, and statistical analysis were used in the study of the priority directions of human capital development in our country and the analysis of the level of development of human capital.

ANALYSIS AND RESULTS

Today, countries pay special attention to the development of human capital. The results of research conducted by the World Bank in 2018 showed that the main part of the wealth of countries is human capital, according to which human capital is 68 percent of the wealth of developed countries, and 41 percent of the wealth of developing countries. In addition, 64 percent of the total capital accumulated on earth to date corresponds to human capital [8]. The development of human capital allows to improve the quality of production and service processes and to reduce the role of extensive economic growth and increase the volume of intensive economic growth.

The results of our country’s human capital index measurement studies are largely related to the effective measures taken in recent years in the education system of our country. In 2021, 34,552.7 billion soums were allocated from the state budget in order to improve the quality of education and modernize it based on the needs of the times, which is 40% of social expenses [9]. It is planned to spend these funds for the following purposes:

- introduction of ICT to all stages of education,
- provision of modern classrooms and educational tools,
- organization of presidential schools,
- organization of universities and centers of digital technologies,
- increase the parameters of admission to higher education,
- improving the qualifications of higher education leaders and pedagogical personnel and the effectiveness of scientific potential,
- to attract foreign leading scientists, specialists-practitioners and highly qualified professors and teachers and to establish joint educational programs, etc.

In particular, in the last five years, the number of higher education institutions in our country has increased to 132 in 2020, which is 1.7 times more than in 2016, and the level of student coverage has also increased by 2.1 times. In 2016, 58,022 young people were enrolled in higher education, in 2020, 148,114, that is, 25 per-cent more, and the indicators of master's training are 2.08 times higher than in 2016 (5,000) in 2020 (10,425). generated the quantity `p ^[9]. Higher education in order to solve the problem of the demand for highly educated and highly qualified specialist personnel in our country by increasing the admission parameters, to prepare personnel for vacant jobs and professions in high demand in the region. it is planned to open branches of institutions ^[9].

The number of higher education institutions (2018–2022) ^[10]

Also, the number of professors, candidates of science and doctors of science working in higher educational institutions is increasing year by year. The efficiency of scientific potential was 31.9% in 2018, and by 2022, this indicator will reach 38.0%.

Number of professors (2018–2022) ^[11]

	2018	2019	2020	2021	2022
The number of professors and teachers	24 368	25 418	26 297	26 837	29 998
Doctors of science	1 415	1 666	2 023	2 201	2 312
Candidates of science	6 351	6 649	7 050	7 769	9 050
Scientific potential	31,9	32,7	34,5	37,2	38,0

Today, it is well known from world practice that the field of digital technologies and ICT is the most profitable field. Specialist personnel working in this field process large amounts of data in a short time as a result of using Big Data, artificial intelligence, robotics, blockchain technologies and other digital technologies. The main raw material in the digital economy is information. Unlike the market economy, it is based on the collection and processing of necessary information. Countries with a highly developed digital economy include the United States, China, the United Kingdom, Denmark, Finland, Singapore, South Korea, and Hong Kong. These countries also rank high in the level of development of human capital. The reason for this is that in these countries, investments in human capital in the last half century are significantly higher than investments in physical capital. These investments were mainly spent on health care, improving the quality of education and developing digital infrastructure, providing sectors and industries with ICT, and developing the field of digital technologies. Recently, with the development of digital technologies, IT companies have been occupying high places in the list of the richest companies in the world. For example, Google, Apple, and Microsoft are the world's leading companies in the IT industry, while the Amazon Internet store is a global trade network based on electronic commerce.

The need of the hour is to introduce the wide use of digital technologies in Uzbekistan, digitization of industries and networks, and the formation of a high generation of digital and information literacy, making good use of world experience. Therefore, effective measures have been taken in our country to create a generation of digital personnel with knowledge, skills and skills in working with digital technologies and to adapt labor resources to new professions emerging in the labor market. In particular, digital technology training centers are being established in the regions, the main purpose of these centers is:

- teaching the population the basics of computer programming, computer graphics, robotics, technological project management and entrepreneurship in the field of e-commerce;

- increase interest in cyber sports and computer games, guide them in this field and take them to international competitions;
- wide involvement of young people in the creation of software products, educational programs and web resources, computer and mobile games that match national values;
- organization of training courses in the field of information and communication technologies for specialists of state and economic management bodies;
- training and retraining of unemployed labor resources for modern professions;
- increase digital and information literacy;
- to create conditions for the graduates who have successfully graduated from the center to work effectively in the IT field and actively participate in startup projects, etc.

CONCLUSIONS AND SUGGESTIONS

Investment in human capital accelerates economic growth in any country. In the period before the pandemic, most countries achieved stable growth in the formation of human capital. Research by scientists shows a significant decrease in the quality of education during the pandemic, the reason for which is the transition of educational processes in schools to online form as a result of quarantine restrictions and interruptions in education due to the lack of development of digital infrastructure in low-income countries. Compensating for these gaps and improving the quality of education is one of the important issues facing the countries of the world. The development of human capital is mainly achieved by providing quality education and improving living conditions. In our opinion, it is appropriate to implement the following measures for the development of human capital in our country:

- the state mainly plays an important role in investing in human capital, the private sector is not considered a leader in this regard. Establishing effective cooperation between the state and private sector in investing in human capital, taking into account the fact that qualified specialists are equally needed in all fields, the development of the field requires modern knowledge and qualified personnel;
- use of the experience of foreign countries (Singapore, Hong Kong, China, etc.) that have a high place in the development of human capital and have achieved effective results;
- introducing the use of digital platforms in order to fundamentally reform the education system, use modern electronic literature, new methods and tools of teaching, ensure the quality of lessons, and the transparency of the assessment and examination system;
- in order to improve the well-being of the population, to implement measures to provide employment and training of unemployed citizens to professions based on the effective use of modern digital technologies;
- to widely introduce the use of the most widely used digital technologies today, to create a national global trade network in the field of e-commerce;
- Establishing mutually beneficial cooperation relations with highly developed companies in the field of IT on personnel exchange, etc.

In an analytical article published on the website of the prestigious US magazine "Foreign Affairs" by the president of the World Bank, Jim Yong Kim: "Neglect of investing in human capital can drastically reduce the country's competitiveness. After all, in order for the country to develop economically, it is necessary to train talented people" ^[12]. The following positive results can be achieved by investing in human capital in order to form a generation of personnel with high scientific potential, modern knowledge and skills in the country:

- Reduction of poverty as a result of the improvement of the living conditions of the population. In particular, quality education brings great efficiency, so it plays an important role in reducing poverty. This can be seen in the history of Ghana: between the 1990s and the beginning of the 2000s, the country managed to dramatically increase the main indicators by doubling the amount of spending on education. As a result, from 1999 to 2012, the country's literacy rate reached 64 percent, and the poverty rate fell from 61 percent to 13 percent ^[13];
- Reduction of social inequality in society. In most countries, children born in relatively well-off families begin to use opportunities from childhood, and this leads to a number of advantages throughout their

lives, on the contrary, children from disadvantaged families do not have access to such opportunities. The state can reduce this inequality by investing in human capital and encouraging investment;

- As a result of the formation of a broad-minded, intelligent stratum in the society, the probability of various types of crimes and violations decreases;
- Some solution to the problem of shortage of digital personnel who have mastered competitive highly qualified and modern professions, etc.
