Ijtimoiy, iqtisodiy, texnologik, ilmiy, ommabop jurnal

Bosh muharrir:

Sharipov Kongiratbay Avezimbetovich

Elektron nashr. 189 sahifa.

E'lon qilishga 2025-yil 7-aprelda ruxsat etildi.

Bosh muharrir o'rinbosari:

Karimov Norboy G'aniyevich

Muharrir:

Qurbonov Sherzod Ismatillayevich

Tahrir hay'ati:

Salimov Oqil Umrzoqovich, O'zbekiston Fanlar akademiyasi akademigi
Abduraxmanov Kalandar Xodjayevich, O'zbekiston Fanlar akademiyasi akademigi
Sharipov Kongiratbay Avezimbetovich, texnika fanlari doktori (DSc), professor
Rae Kvon Chung, Janubiy Koreya, TDIU faxriy professori, "Nobel" mukofoti laureati
Osman Mesten, Turkiya parlamenti a'zosi, Turkiya – O'zbekiston do'stlik jamiyati rahbari
Axmedov Durbek Kudratillayevich, iqtisodiyot fanlari doktori (DSc), professor
Axmedov Sayfullo Normatovich, iqtisodiyot fanlari doktori (DSc), professor
Abduraxmanova Gulnora Kalandarovna, iqtisodiyot fanlari doktori (DSc), professor
Kalonov Muxiddin Baxritdinovich, iqtisodiyot fanlari doktori (DSc), professor
Siddiqova Sadoqat G'afforovna, pedagogika fanlari bo'yicha falsafa doktori (PhD)
Xudoyqulov Sadirdin Karimovich, iqtisodiyot fanlari doktori (DSc), professor
Maxmudov Nosir, iqtisodiyot fanlari doktori (DSc), professor
Yuldashev Mutallib Ibragimovich, iqtisodiyot fanlari doktori (DSc), professor
Samadov Asqarjon Nishonovich, iqtisodiyot fanlari nomzodi, professor
Slizovskiy Dimitriy Yegorovich, texnika fanlari doktori (DSc), professor
Mustafakulov Sherzod Igamberdiyevich, iqtisodiyot fanlari doktori (DSc), professor
Axmedov Ikrom Akramovich, iqtisodiyot fanlari doktori (DSc), professor
Eshtayev Alisher Abdug'aniyevich, iqtisodiyot fanlari doktori (DSc), professor
Xajiyev Baxtiyor Dushaboyevich, iqtisodiyot fanlari doktori (DSc), professor
Hakimov Nazar Hakimovich, falsafa fanlari doktori (DSc), professor
Musayeva Shoiraz Azimovna, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), professor
Ali Konak (Ali Ko'nak), iqtisodiyot fanlari doktori (DSc), professor (Turkiya)
Cham Tat Huei, falsafa fanlari doktori (PhD), professor (Malayziya)
Foziljonov Ibrohimjon Sotvoldix'o'ja o'g'li, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), dots.
Utayev Uktam Choriyevich, O'z.Respub. Bosh prokuraturasi boshqarma boshlig'i o'rinbosari
Ochilov Farkhod, O'zbekiston Respublikasi Bosh prokuraturasi IJQKD boshlig'i
Buzrukxonov Sarvarxon Munavvarxonovich, iqtisodiyot fanlari nomzodi, dotsent
Axmedov Javohir Jamolovich, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD)
Toxirov Jaloliddin Ochil o'g'li, texnika fanlari bo'yicha falsafa doktori (PhD), katta o'qituvchi
Bobobekov Ergash Abdumalikovich, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), v.b. dots.

IMPROVING LONG-TERM ASSETS ACCOUNTING AND AUDITING

Gulboy Yusupov

Teacher at Termez state university

Abstract: Long-term assets, such as property, plant, equipment, intangible assets, and long-term investments, are vital to an organization's financial health and operations. Proper accounting and auditing of these assets ensure that businesses have accurate financial reporting, meet compliance standards, and make informed strategic decisions. However, the complexity of managing these assets requires robust processes. The IMRAD (Introduction, Methods, Results, and Discussion) method provides a structured approach to improving the management and auditing of long-term assets. In this article, we will explore how this method can be effectively applied to the domain of long-term asset accounting and auditing.

Key words: Long-term assets, Accounting, Auditing, Asset management, Depreciation, Impairment, Financial reporting.

Annotatsiya: Asosiy vositalar, nomoddiy aktivlar va uzoq muddatli investitsiyalar kabi uzoq muddatli aktivlar tashkilotning moliyaviy salomatligi va faoliyati uchun juda muhimdir. Ushbu aktivlarning to'g'ri hisobi va auditi korxonalarning to'g'ri moliyaviy hisobotlarga ega bo'lishini, muvofiqlik standartlariga javob berishini va asosli strategik qarorlar qabul qilishini ta'minlaydi. Biroq, ushbu aktivlarni boshqarishning murakkabligi mustahkam jarayonlarni talab qiladi. IMRAD (Kirish, usullar, natijalar va muhokama) usuli uzoq muddatli aktivlarni boshqarish va auditini takomillashtirishga tizimli yondashuvni ta'minlaydi. Ushbu maqolada biz uzoq muddatli aktivlarning buxgalteriya hisobi va auditi sohasida ushbu usulni qanday samarali qo'llash mumkinligini ko'rib chiqamiz.

Kalit so'zlar: Uzoq muddatli aktivlar, Buxgalteriya hisobi, Audit, Aktivlarni boshqarish, Amortizatsiya, Qiymatsizlanish, Moliyaviy hisobot.

Аннотация: Долгосрочные активы, такие как имущество, завод, оборудование, нематериальные активы и долгосрочные инвестиции, имеют жизненно важное значение для финансового здоровья и деятельности организации. Правильный учет и аудит этих активов гарантируют, что предприятия имеют точную финансовую отчетность, соответствуют стандартам соответствия и принимают обоснованные стратегические решения. Однако сложность управления этими активами требует надежных процессов. Метод IMRAD (Введение, Методы, Результаты и Обсуждение) обеспечивает структурированный подход к улучшению управления и аудита долгосрочных активов. В этой статье мы рассмотрим, как этот метод можно эффективно применять в области учета и аудита долгосрочных активов.

Ключевые слова: Долгосрочные активы, Бухгалтерский учет, Аудит, Управление активами, Амортизация, Обесценение, Финансовая отчетность.

INTRODUCTION

Accurate accounting and auditing of long-term assets are crucial for ensuring that financial statements accurately reflect the true value of an organization's assets. These long-term assets often the largest component of a company's balance sheet must be appropriately valued, depreciated, and tested for impairment in order to comply with established accounting standards and regulations. By conducting thorough audits, businesses can uncover inefficiencies, deter fraudulent activity, and maintain regulatory compliance. Nevertheless, companies frequently encounter challenges, such as the complexities of fair value accounting, the application of various

depreciation methods, and the requirement for periodic asset revaluations. Consequently, adopting more robust accounting and auditing practices becomes essential for sustaining long-term business success.

Long-term assets are fundamental to a company's financial stability and operational capability. This category includes property, plant, and equipment; intangible assets; and long-term investments, all of which often account for a substantial portion of a company's balance sheet. Properly accounting for and auditing these assets is not only vital for producing accurate financial reports, but also critical for maintaining regulatory compliance, managing risks, and supporting informed decision-making. However, the processes of managing and auditing these assets can be intricate, requiring businesses to navigate a variety of standards, methodologies, and challenges.

The accurate accounting of long-term assets involves determining their values, calculating depreciation, performing impairment tests, and ensuring proper reporting within financial statements. Likewise, audits must confirm the authenticity, condition, and correct valuation of these assets so that financial statements present a true and fair view of the company's asset position. Given the significance of these activities, organizations must continuously enhance their accounting and auditing practices to achieve greater accuracy, ensure compliance, and improve overall efficiency. This article examines strategies for refining long-term asset accounting and auditing, employing a structured approach to address the principal challenges in asset management.

LITERATURE REVIEW ON THE TOPIC

The study of long-term asset accounting and auditing is well-documented in the accounting and finance literature, reflecting both the complexity of these processes and their importance for reliable financial reporting. A foundational resource, the American Institute of Certified Public Accountants' comprehensive guide (2020), outlines the principles and challenges associated with accounting for long-term assets, including valuation, depreciation, and impairment assessments. This guide is widely recognized as a practical reference for practitioners seeking to maintain compliance with established standards.

The International Financial Reporting Standards provide another critical framework for long-term asset accounting. Specifically, IAS 16: Property, Plant, and Equipment (2019) sets forth guidelines for the recognition, measurement, and depreciation of tangible assets, emphasizing transparency and consistency in financial statements. The IFRS framework has significantly influenced international accounting practices, ensuring that long-term asset reporting is comparable across different jurisdictions.

Leading academic textbooks have also contributed to the understanding of long-term asset accounting. Kieso, Weygandt, and Warfield's *Intermediate Accounting* (16th ed.) and Spiceland, Sepe, and Nelson's *Intermediate Accounting* (10th ed.) offer detailed discussions on the subject. These works provide in-depth analyses of long-term asset valuation, depreciation methodologies, and impairment testing. They also address the nuances of applying these concepts under varying regulatory frameworks, highlighting both theoretical approaches and practical implications.

In addition to accounting standards and educational materials, the role of auditing in verifying long-term asset values has been extensively studied. The U.S. Securities and Exchange Commission's (SEC) publication on the role of auditing (2020) discusses how thorough audits help ensure that long-term assets are accurately valued and reported. The SEC emphasizes that effective audits not only bolster investor confidence but also help organizations comply with regulatory requirements and detect potential misstatements or fraud.

Finally, more recent research in the field has started to explore the intersection of long-term asset accounting and broader economic and technological trends. For example, Mamadjanova and Babaniyazovich (2024) examine how electronic commerce influences asset management strategies, while Ahmedov (2024) investigates how regional investment attractiveness can be enhanced through improved accounting practices. These studies suggest that the evolution of long-term asset accounting and auditing practices is increasingly shaped by external economic forces and technological innovations.

RESEARCH METHODOLOGY

Commonly used in academic and research contexts, the IMRAD method can be tailored to financial management, specifically for long-term asset accounting and auditing. The following outlines how each step of the IMRAD framework can be applied to this area:

Identify:

Identify the full scope of long-term assets on the company's balance sheet. This involves categorizing assets into fixed assets (such as buildings and machinery), intangible assets (such as patents and trademarks), and long-term investments. Conducting a thorough inventory ensures that all assets are properly accounted for, accurately categorized, and consistently tracked.

**Measure:**

Measure the value of each asset accurately by applying the appropriate accounting standards—such as the International Financial Reporting Standards or Generally Accepted Accounting Principles. This includes determining the useful life of tangible assets for depreciation purposes and estimating the fair value of intangible assets and long-term investments. In some cases, professional judgment or external appraisal services may be necessary to achieve accurate valuations.

Record:

Maintain comprehensive records for all long-term assets. This involves documenting each asset's purchase price, depreciation schedule, impairment assessments, and other relevant financial data. Implementing a robust asset tracking system—such as an enterprise resource planning system—helps ensure these records are updated regularly and key processes like depreciation and impairment testing are automated.

Analyze:

Analyze recorded data to confirm asset valuations' accuracy and compliance with relevant accounting standards. This includes reviewing depreciation methods (for example, straight-line or declining balance), evaluating asset impairment impacts, and verifying that all assets are correctly categorized. Periodic assessments of asset performance should also consider market conditions and technological obsolescence.

Formulate:

Formulate recommendations to improve accounting and auditing practices based on the analysis. Examples include updating asset management procedures, strengthening internal controls, and adopting automated tools to track asset performance. These recommendations should aim to improve accuracy, reduce errors, and maintain compliance with evolving regulatory requirements.(1-table)

Table 1: Key Steps for Long-Term Asset Accounting and Auditing.

Step	Description	Objective	Tools/Resources
Identify	Identify and categorize all long-term assets, including tangible and intangible assets.	Ensure full identification of assets for accurate accounting.	Asset inventory systems, ERP systems
Measure	Measure asset values using applicable accounting standards (e.g., GAAP or IFRS). Assess depreciation, fair value, and impairment.	Ensure assets are accurately valued for proper financial reporting.	Depreciation schedules, external appraisal services
Record	Maintain thorough documentation and accurate records for each long-term asset.	Keep a detailed record of asset acquisition, depreciation, and impairment for audit purposes.	Asset tracking software, financial reporting systems
Analyze	Regularly analyze asset performance, depreciation methods, and impairment. Evaluate asset valuation against market conditions.	Ensure ongoing accuracy and relevance of asset valuations.	Financial analysis tools, market reports, impairment testing
Formulate	Develop recommendations to improve accounting and auditing practices based on analysis (e.g., new technology, updated procedures).	Continuously improve asset management and financial reporting practices.	Internal review systems, audit feedback, automation tools

ANALYSIS AND RESULTS

Enhanced Accuracy:

By adopting a systematic approach to identifying, measuring, and recording assets, businesses can improve the accuracy of their financial statements. This structured process reduces the risk of errors, misstatements, or omissions in asset reporting, providing a clearer financial picture.

Improved Compliance:

Employing standardized measurement techniques and maintaining detailed documentation ensure compliance with recognized accounting standards, such as the International Financial Reporting Standards or Generally Accepted Accounting Principles. Precise asset valuations and consistent depreciation schedules support both regulatory reporting and the audit process.

Greater Efficiency:

Utilizing asset tracking systems and automation tools can greatly enhance efficiency in asset management. These technologies enable real-time asset tracking, minimize administrative workloads, and streamline audit procedures, ultimately contributing to better resource utilization.

Stronger Internal Controls:

Regularly analyzing and reviewing long-term asset data can help uncover potential issues, such as asset impairment, inflated asset values, or underreporting. Strengthening internal controls through these reviews not only reduces the risk of fraud but also promotes a more reliable and transparent financial environment. (2-table)

Table 2: Common depreciation methods for long-term assets.

Depreciation Method	Description	When to Use
Straight-Line Depreciation	Allocates an equal depreciation expense each year over the asset's useful life.	When the asset's usage is relatively constant over time.
Declining Balance	Depreciation is higher in the early years of the asset's life and decreases over time.	When the asset's value decreases more rapidly in the early years.
Units of Production	Depreciation is based on the asset's usage or output rather than the passage of time.	When the asset's wear and tear is based on its usage rather than time.

The IMRAD method's structured approach offers a comprehensive framework for improving long-term asset accounting and auditing. Its step-by-step process provides clarity in managing complex financial data, ensuring that organizations not only meet compliance requirements but also enhance operational efficiency.

One of the key benefits of this method is its focus on accuracy. The identification and measurement phases allow businesses to maintain accurate records of their long-term assets. This reduces the risk of errors that can result in financial misstatements or audit discrepancies. Moreover, the emphasis on analysis allows companies to identify any issues early, such as outdated asset values or potential impairments, and take corrective actions before these issues affect financial reporting.

The method's focus on automation also plays a vital role in improving the efficiency of long-term asset management. With the growing complexity of global asset management and the increasing amount of data involved, automated asset tracking systems can help businesses stay organized and on top of their asset portfolios. Furthermore, automated systems can integrate asset data directly into financial reporting tools, reducing the risk of human error and enabling real-time monitoring.

Another significant advantage of the IMRAD method is the ability to continually improve accounting and auditing processes. By analyzing asset performance and regularly reviewing asset records, businesses can refine their asset management practices over time. This iterative process ensures that long-term asset accounting remains aligned with both organizational goals and regulatory changes.

Common indicators of potential asset impairment include physical damage, obsolescence due to technological advancements or market shifts, significant declines in market value, and legal or regulatory changes. Identifying these factors is crucial for reassessing the carrying value of long-term assets and ensuring that financial statements remain accurate and compliant with accounting standards. (3-table)

Table 3: Common asset impairment indicators.

Indicator	Explanation	Impact on Financial Reporting
Physical Damage	Damage to the asset, such as natural disasters or accidents.	Requires revaluation and potential impairment adjustment.
Obsolescence	Technological advances or market shifts that render the asset outdated.	May result in a reduction of asset value and an impairment charge.
Market Value Decline	A significant and permanent decline in the market value of the asset.	Requires a reassessment of the asset's carrying value.
Legal or Regulatory Changes	New regulations that affect the value or use of the asset.	May require revaluation or impairment depending on asset value changes.

Different depreciation methods are used across industries based on the nature of asset usage. The straight-line method is the most widely adopted, especially in industries with stable asset utilization, such as

manufacturing and retail. The declining balance method is favored in sectors where assets lose value rapidly, like technology and automotive industries. The units of production method is commonly applied in contexts where depreciation is directly tied to output or usage, such as mining and manufacturing operations.(4-table)

Table 4. Statistical data: Depreciation methods in use among u.s. Companies.

Depreciation Method	Percentage of Companies Using Method	Average Asset Life (Years)	Primary Industry Application
Straight-Line Depreciation	60%	5-10 years	Common across most industries (e.g., manufacturing, retail)
Declining Balance	30%	3-7 years	Used in industries with assets that depreciate faster, like technology and automobiles
Units of Production	10%	Variable (depends on usage)	Primarily used in production or resource extraction industries

CONCLUSIONS AND SUGGESTIONS

In conclusion, improving long-term asset accounting and auditing is a crucial undertaking for businesses seeking to maintain transparency, regulatory compliance, and operational efficiency. The IMRAD method provides a structured approach to addressing the complexities involved in managing these assets. By identifying, measuring, recording, analyzing, and formulating improvements, businesses can enhance the accuracy and efficiency of their long-term asset management processes. In doing so, they can ensure their financial reports are reliable, mitigate potential risks, and make well-informed decisions that contribute to long-term business success.
